I’m officially Cactaceae Collections Manager here at the DBG, where I’ve been for 13 years. Our collection is one of the largest and most complete in the world, with over 10,000 plants in total. I have a BS and MS in Plant Protection from the U of A and am a Certified Arborist, my first position here. I’ve been collecting Euphorbias since about ’77 and a member of the CACSS since the mid-’90’s. The talk will be an overview of Euphorbia and the characteristics that make the plants so fascinating. Care and cultivation and anything else relevant to inspire the collector will be included.
August Central Spine Deadline: August 7, 2014

2014 Meetings

Sunday, July 27
Board Meeting 11 am
General Meeting 2 pm

Sunday, August 24
General Meeting 2 pm

(Members are welcome to attend Board Meetings in Farrington Hall)
President’s Letter  
July 2014  
Wayne Whipple

I trust everyone survived our first monsoon of the summer and the attendant haboob. Many trees in my area were blown over, and the powdery red dust still lingers. As I write this letter, I am watching the yard-maintenance crew using their high-powered blowers to pile up pine needles. We have three pine trees on our property, and it seems like every needle on them is now on the ground. It looks more like a mountain lot than one in a sandy desert.

A couple of important dates should be on your calendar for CACSS events. I always look forward to our October auctions, which have been mostly held in the Wildflower Garden Pavilion. Some of us were concerned that we would not be able to hold it there this year because of major construction being done at the Desert Botanical Garden. But our DBG contact assured me that the construction would not deter us from using the Pavilion again this year. So mark the date of Sunday, October 19, on your calendar. There is no better way for a collector to enlarge and enhance a collection of cacti and succulents than by winning the bids for the great plants donated by our Members. This event’s success depends not only on the bidding for plants, but also on the many donations of high-quality plants. Mike Gallagher is this year’s Chair, and I am sure he will get all the help he needs from our Members. As always, this auction is in lieu of a regular general meeting for the month.

The other date to reserve is Sunday, December 7, for the annual Holiday Party. Dana Hiser has booked the event at the Mountain View County Center, Scottsdale, the same place that it has been held for the past four years. This is always a fun affair, and I am sure it will be this year as well. We do, however, need a Member or Members to organize the details for the party, which consist mainly of coordinating the food and getting the room set up for the dinner. If you can help, please let me know.

Please Wear Your Name Tag at Monthly Meetings

Board Member Jo Davis asks members to wear their name tags at monthly meetings and other club events. Members then can more easily spot guests and talk with them about the guest’s interests and CACSS. If you need a lanyard to hang the name tag around your neck, see Jo at the meetings.

---

Please bring boxes to the meetings so you can carry your new plants home more easily.  
Jo Davis
Neoraimondia arequipensis

Neoraimondia is a little known genus of South American columnar cacti, and although we have a few large specimens here in the Garden, it is hardly seen in the Phoenix area. Why, I don’t know, because our largest one, *Neoraimondia herzogiana*, was accessioned in 1939 and has survived the extremes of our weather here for all these years. The other species, *N. arequipensis*, is rare here because it is more frost tender.

*Neoraimondia herzogiana* is named after Antonio Raimondi, an Italian-born Peruvian geographer and scientist. Many schools, theaters, museums, and institutes of higher learning also carry his name. While in Peru, I was fortunate enough to see *Puya raimondii*, the world’s largest Bromeliad growing at around 13,000 ft. *Neoraimondia herzogiana* grows in the highlands of central Bolivia, where it develops a single trunk and branches several feet above ground. *Neoraimondia arequipensis* is common along the coastal highlands of Peru and branches at or near the base.

An unusual element of Neoraimondias is that their spine clusters produce new spines and flowers every year, each spine cluster therefore growing longer every year. This growth is very atypical for the cactus family, so it’s amazing to see areoles almost as long as one’s finger.
Puya Raimondi
**Aloes and Lilies of Ethiopia & Eritria**  
Book by Sebsebe Demissew and Inger Nordal

Google the title or cut and paste this website:  
http://nhm2.uio.no/botanisk/nbf/temp/Sebsebe%20et%20Nordal%202010%20Lilies%20-%%20SCREEN%2020091220.pdf

Some of the CACSS aloe collector members may like to look at this book, on sale in 2003, but now out of print. Scroll down on the website and you will find all the information, and pictures of the flora in Ethiopia and Eritrea. It really is a good read and very informative. Ethiopia has one of the largest fresh water lakes, which is a result of the vast amount of rainwater it receives.

PLANT QUESTIONS??? WHOM TO CONTACT!!!

Many CACSS members have experience with different kinds of succulent plants. I hope they will add their names to the following list. Call or e-mail Diana Decker, *Central Spine* editor. Find contact information on p. 4.

For now, the list is simply alphabetical with principal interests. When more members add their information, the list will be cross-referenced by topic.

**DOUG DAWSON**
480-893-1207
dawsonlithops@hotmail.com
Specializations include Growing from Seed, Flora of Namibia, Lithops, other Mesembs, Melocactus, Miniature Cacti and Succulents of Arizona.

**MIKE GALLAGHER**
602-942-8580
mgallagher26@cox.net
Specializations include Aloes, Haworthias, Columnar Cacti, and *Turbinicarpus*.

**DEAN PATRICK**
480-759-0312
desertpatrick@cox.net
Specialization in softwood stem-cuttings, plant division and seed starting (rooting cacti, agave and aloe).

**STEVE PLATH**
623-915-7615
revegdude1@juno.com
Specializations include General Propagation and Desert Revegetation, *Ariocarpus*, *Astrophytum*, *Cyphostemma*, *Echinocereus*, *Fouquieria*, *Theilocactus*.

**DAN SMITH**
480.981.9648
smithdans@cox.net
Specializes in adeniums. raising adeniums from seed, grafting and adenium culture in general

**BOB TORREST**
480-994-3868
robertst9114@msn.com
Specializations include Desert Landscaping, Unusual (including Rare Fruit) Trees and Shrubs, Aloes, Agaves, Columnar Cacti, *Trichocereus*, and *Opuntia*.
